Process / Material	Why 1: Double panel were due to feeding of same panels during process.				Why 1:				
	Why 2: Feeding of same panels, were due to mix up of panels from "for rework items". >Items for rework were only placed near the folder area (see attached picture for reference)				Why 2:				
	Why 3: Rework items were due to weak application of mellite to panels.				N/A				
	Why 4: Weak application of mellite were due to insufficient supply of mellite, mellite were on low level.								
	Why 5: Checking of level of mellite and glue for refilling every 20 mins was not perform.
